

**Investment Opportunities for the
Establishment of Extractive Projects
According to the Mineral Investment
Law No. 91 of 1988 and Investment
Law No. 13 of 2006**

Files for Investment

Firstly, Phosphate residue files:

- 1- Project of extraction and mining of phosphate residue and phosphoric acid (Al-Anbar governorate / Sawab valley).
- 2- Project of extraction and mining of phosphate residue for the production of phosphate fertilizers and phosphoric acid (Al-Anbar governorate / Al-Huri valley).

Secondly, free sulfur files:

- 1- Project of extraction and mining of free sulfur in Al-Mashraq field No. 2 (Nineveh governorate).
- 2- Project of extraction and mining of free sulfur in Al-Mashraq field No. 3 (Nineveh governorate).
- 3- Project of extraction and mining of free sulfur in Al-Lazzaka field (Nineveh governorate).

Thirdly, Cement files:

- 1- Project plant of cement production (Nineveh governorate).
- 2- Project plant of cement production (Al-Anbar governorate).
- 3- Project plant of cement production (Al-Najaf governorate).
- 4- Project plant of cement production (Wasit governorate).
- 5- Project plant of cement production (Al-Muthanna governorate).
- 6- Project plant of cement production (Karbala governorate).
- 7- Project plant of cement production (Al-Diwaniya governorate).

Fourthly, Silica sands files:

- 1- Project plant of glass and plumping industry (Al-Anbar governorate).
- 2- Project plant of thermostone production (Al-Anbar governorate).
- 3- Project plant of silicon industries production (Al-Anbar governorate).
- 4- Project plant of colored glass manufacture from sand (Al-Najaf governorate / Hill of Najaf).
- 5- Project for the production of feldspar ore for the manufacture of ceramic, glass and other industries (Al-Najaf governorate).

Fifthly, clay files:

- 1- Project plant of alumina and clinker production from kaolinite clay (Al-Anbar governorate).
- 2- Project plant of the red brick manufacture from colored kaolinite clay (Al-Anbar governorate).
- 3- Project for the production of bricks from old clay (Wasit, Kirkuk and Diyala governorates).

Sixthly, Carbonates and sulfate files:

- 1- Project plant for the production of sodium carbonate for the manufacture of glass, detergent and paper pulp (Al-Anbar governorate).
- 2- Project plant for the production of sodium carbonate for the manufacture of glass, detergent and paper pulp (Al-Muthanna governorate).
- 3- Project plant for the production of calcium carbonate residue for the manufacture of dyes, drugs, rubber and as filling material for paper industries (Al-Anbar governorate).
- 4- Project plant for the production of sodium sulfate for the detergent manufacture and other industries (Salahaddin governorate).

Seventhly, files of magnesium thermal bricks:

- 1- Project for the production of magnesium thermal bricks from dolomite rocks (Al-Muthanna governorate).
- 2- Project for the production of magnesium bricks from dolomite rocks (Al-Anbar governorate).

Eighthly,

- Project of extraction and production of building materials based on gypsum (Al-Anbar, Nineveh, Wasit and Salahaddin governorates).
